

CIS4-ST IP Intercom

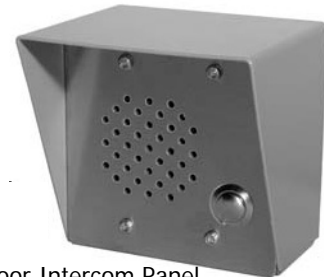

Vandal Resistant

Complete integrated vandal resistant intercom assembly attaches to the network. Includes vandal resistant intercom with push-button, Network Interface Unit and Talkmaster-LE software for Windows PC.

Call-in Station

Complete vandal-resistant call-in station with integral speaker/microphone and momentary, normally open, push-to-call button. Shown with hooded, surface mount, outdoor enclosure.

The faceplate is 12 gage, brushed stainless steel with tamper-resistant, #6-32 'pin-in-hex' hardware. An optional, red mushroom button can be substituted at extra cost at the time of order.

Outdoor Intercom Panel

Indoor Intercom Interface

IP7-ST Network Interface Unit

- Simple configuration and easy installation (indoor)
- Clear, crisp audio using 64 kbps bandwidth
- Utilize existing IP Network Infrastructure
- Operates over wired, wireless or fiber networks
- Power over Ethernet (PoE) or AC/DC power supported
- Durable Industrial Design with DIN rail mount or optional surface mount
- On-board relay and sensor for door/gate access control and management
- Flexible Audio I/O supports Electret or Dynamic microphone and Line In/Out
- Optional Integrated 10/100 Two-Port Switch
- Connect to VoIP Systems via TalkMaster™ SIP Media Gateway

Talkmaster-LE: Manages IP based Intercoms and PA systems from any Windows PC. Easily configure Intercoms, control communications and archive audio files.

- IP-based and digital from end-to-end
- Selective or master call to page all stations
- Master control and auto detection (integrated UDP polling)
- Audio file playback (.WAV)
- Remote and local digital volume control
- Supervised System – automatically identifies non-reporting intercoms
- Fail-Forward fault tolerant design
- Utilizes PC Multimedia microphone and speaker
