

# TruView-Touch7

## Video, Audio Multi-dialer IP Intercom Touch-panel Station

- Interactive 7-inch touch screen display allows users to select the apartment or person
- The Video Entry Unit controls door entry using a Smartphone App
- Administration portal provided by cloud web-browser interface
- Audio noise cancelation provides clear intercom sound
- Integrated IP Camera that can be viewed on App
- Fast to deploy, easy to maintain

The TruView-Touch offers more than the basic functionality of a modern door intercom. There are many excellent benefits: The visitor can easily select his contact person via name. If the selected person does not answer the call, alternative subscribers such as the colleague of the same group, a

## Features

- **Door Entry System** is an exterior rated access call box for residential, multi-family and commercial applications.
- **SIP/IP calling via POE**  
A single POE (power over ethernet) connection is used to provide both data and power to the TruView-Touch panel up to 300 feet from head-end.
- **Video Calling to Phone, Tablet and PC**  
The resident will view who is at the door and be able to release the door-lock from the app giving access to the visitors. With one-way video, two-way voice, visitors will not be able to see the resident, but the resident will see the visitor.
- **Video and Still Image - Date and Time Logging**  
The resident app and management portal display an image of all pin uses and a five second video of all video calls with date, time and name of resident called. Data is stored for 90 days and can be exported via csv.
- **Group Calling**  
One call from the panel will call all devices in the group. Family groups can be added by management in the portal (resident control of this feature is due Q2-2020).
- **Limited Use Pins**  
This allows residents to send an entry pin from the MyDoorView app via text to a guest that will auto expire after pre-determined time and/or pre-determined number of uses from 1-99. All successful and failed pin uses will capture an image. More than five failed attempts in a row will notify management by SMS text and/or email with images.
- **Door and Gate Control**  
This helps management monitor the traffic and keep track of all vehicle's and/or people entering the property, creating entry logs.
- **Anti-glare Tempered Touch Glass**  
Matte finish reduces glare, resists fingerprints, and supports gloved hands.
- **Multi-purpose Mounts**  
Flush Mount, Surface Mount and Surface Mount with Rain Hood.
