TVIP-FaceBioProSoft

The management software provides control and viewing of all the biometric Face recognition FaceBioPro panels.

The functions include configuration of panels, management of face credentials, integration with other panels as well as IP cameras on the network.
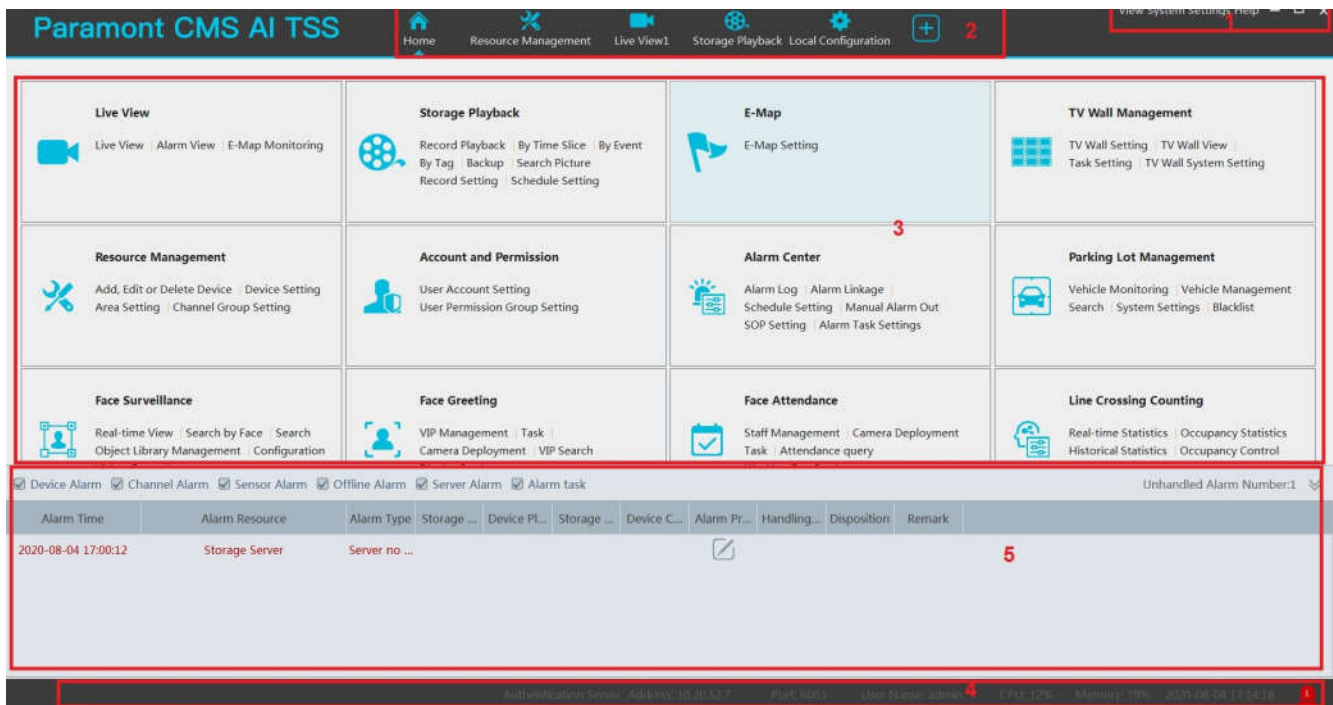

This management software controls multiple panels, allowing you to manage and share biometric credentials with all the panels on the network.

Alarms caused by detected over-temperature or a person not wearing a mask are sent to the central control display

Features

- Provides a live view of all the camera views from the panels and IP cameras attached to the network
- Records video from all the panels and IP cameras for review
- Manages all the alarm conditions including temperature and mask detection alarms as well as standard IP motion alarms
- Face recognition database for surveillance and matching.
- View temperature measurements and statistics from all the users.
- The management software provides easy editing of all functions and devices.
